EMPTY HAND AND DEFENSIVE PISTOL SKILLS ARE A MUST FOR ANY PERSON CARRYING A CONCEALED HANDGUN

Many shooters think, unwisely, that once they are licensed to carry concealed their handgun becomes the answer to any defensive question that might come up.

Nothing could be further from the truth.

In addition to defensive shooting skills, our 2-day Defensive Hand-to-Hand and Concealed Carry course teaches empty-hand combatives and street self-defense techniques that can be used in close quarters when a weapon can't be utilized;

either because it can't be justifiably brought into play or because time and/or space needs to be created in order to effectively deploy it.

Also covered are methods for accessing a handgun in close quarters, retaining it once it has been deployed, defensive tactics, escalation prevention and more!
